Objective

Computer Science undergraduate seeking opportunities to apply programming and web development skills in real world projects. Passionate about software development, problem solving, and building efficient systems while continuously learning new technologies.

Experience

- 247 Virtual Solution** September 2025 - February 2026
Web Development Intern
Worked on live websites including 247virtualsolution.com/,247digitalmarketingagency.com/ and 247medicalbilling.com/
Implemented Schema Markup and RDF structured data for live production websites.
Cloned skymarketing.com.pk/ using WordPress for development practice.
Built an online spices store using WooCommerce and Shopify.
Performed content posting and updates on live websites.

Education

- Numl university islamabad** 2024 - present
BS CS(currently in 5th semester)
Cgpa: 3.91
- Astron college of science and commerce 6th rd rwp** 2023
Intermediate
89.7%
- Islamabad model school for girls** 2021
Matric
89.9%

Projects

- Social media platform-Database design project**
Developed ERD capturing essential entities like Users, Posts, Comments, Likes, and Friendships
- Hospital emergency room management system**
Developed a C++-based system to manage emergency room patients using a max-heap to prioritize treatment based on severity (1-5 scale).
- City router planner**
Implemented a Graph class with operations to add/remove cities and routes, and compute shortest distances using BFS algorithm.
- Real Estate Management System**
Developed a Real Estate Management System to manage property listings, buyers, and sellers efficiently. The system allows users to add, search, and manage property records using object-oriented programming concepts.
- Candy Shop Management System**
Created a Candy Shop Management System to handle candy inventory, pricing, and sales records. The project implements features for adding products, updating stock, and organizing shop operations efficiently.

Skills

- programing: C++, Java, Python (basic)
- Concepts: Object oriented programming in java, Data Structures, ERD Design
- SEO and Web: Schema Markup, RDF Data, Basic SEO
- Platform and Tools: Wordpress, Shopify, woocommerce, wix, webly
- Web Development: html, javascript, css, php and laravel (basic)

Interests

- Learning new programming language and exploring tutorials
- Solving coding challenges on hackerrank
- Learning Web Development and SEO

Languages

- English
- Urdu
